

INTERNATIONAL CONFERENCE ON VENTILATORY SUPPORT IN ELDER. PALLIATIVE AND END OF LIFE CARE PATIENTS. 1° EDITION

Hotel Royal Continental
6th- 7th MARCH 2026 - Naples (Italy)

Presidents: *Antonio Esquinas - Nicola Vargas*

Conference Presentation

Every day in clinical practice, we come across patients requiring care in a palliative context or elderly patients with clinical characteristics or a legal prerogative of do-not-intubate (DNI). Patients with respiratory failure can benefit from palliative use of non-invasive ventilation (NIV) not only in the sense of comfort care. Efforts have been made in the past to consider this therapeutic approach as an integral part of caring for all patients under invasive mechanical ventilation. Evidence from international guidelines and consensus statements has shown that NIV can be applied in a clinical context even out of the intensive care unit (ICU). This is possible if NIV is applied from a clinical, ethical, physiopathological, organizational, and rehabilitative point of view.
